

## GF2785

## BEAM CLAMPS

Wt/100pcs 83 Lbs

- For use with beams up to  $\frac{3}{4}$ " flange thickness and Channels, CH1000, CH1100, CH2000, CH3000, CH3300, CH3301, CH4000, CH4100.

Design Load Each  
1000 Lbs  
Use in Pairs Only

Materials &amp; Finishes: EG, SS

| Material Specifications |                 |                         |                                                                                                                    |
|-------------------------|-----------------|-------------------------|--------------------------------------------------------------------------------------------------------------------|
| Material                | Material Code   | ASTM Designation        | ASTM Description                                                                                                   |
| Steel:                  | Use Finish Code | ASTM A1011<br>SS GR 33. | UBS channels are accurately and carefully cold formed to size from low-carbon strip steel. 12 Ga., 14 Ga. & 16 Ga. |
| [Stainless Steel:       | SS304           | A 240 TYPE 304          | Heat resisting chromium and chromium-nickel stainless steel plate, sheet, strip for pressure vessel.               |
|                         | SS316           | A 240 TYPE 316          |                                                                                                                    |

| Finish Specifications |             |                                                                                                                                                                                                                                                                                                                   |
|-----------------------|-------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Finish                | Finish Code | Description                                                                                                                                                                                                                                                                                                       |
| Zinc Electroplated    | EG          | Zinc electroplating is used to coat plain steel. The electroplating process requires that the component be immersed in a solution containing zinc ions that are deposited on the surface of the part. Electroplated zinc is shiny and smooth, and is suitable for indoor environments with low relative humidity. |
